FasTech Creates a Science, Technology and Intellectual Property Advisory Board to Continue to Offer its Clientele Expertise in the Latest Technological Know-How and Its Application

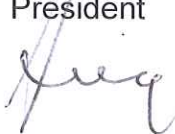

FasTech, a leading provider of process technology and product solutions in the field of industrial organic chemistry, catalysis, monomer synthesis, plastic materials and elastomers, announces the creation of a Science, Technology and Intellectual Property Board, which has been established for the purpose of providing a solid and reliable scientific foundation to the technology solutions FasTech offers.

The Advisory Board aims to offer to FasTech's customers the latest, most innovative and appropriate technology solution and know-how to those customers' needs, drawing from its diverse and deep scientific and technology-property expertise.

The Advisory Board will assist Fastech's customers in any and all of the following: the proper selection of the most suitable technology, its transfer and implementation in industrial plants and market, the further development of specific processes and products, the continuous improvement of the basic technology know-how, the co-operation and assistance with scientific institutes and academies. The Board will also support the customer's intellectual property (IP) needs, including by liaising with legal advisors and other experts.

The new Advisory Board will comprise very well world-wide known and respected scientists, engineers and IP experts, namely: Prof. Paolo Galli, Prof. Francesco Ciardelli, Dr. Engineer Gabriele Omicini and Dr. Sante Granelli. The Advisory Board activity will be led by its Chairman, Prof. Paolo Galli.
